SUMMARY

Software Developer Intern with hands-on experience in building and maintaining enterprise-scale web applications and business workflow systems. Involved in full-stack development across backend services, APIs, databases, and frontend interfaces, with exposure to debugging, testing, and system improvements. Comfortable working in collaborative development environments and contributing to production-oriented software systems.

EXPERIENCE

BDO South Africa — Junior Software Developer Intern
Oct 2025 – Present

- Contribute to the development and maintenance of enterprise full-stack applications using C#, ASP.NET, React, TypeScript, and MySQL.
- Develop and enhance a large-scale business workflow grading system with modules including applications, assessments, meetings, surveys, dashboards, reporting, and administration.
- Build and maintain RESTful APIs, backend services, database structures, and frontend interfaces.
- Debug, test, and resolve issues across frontend and backend layers to improve system stability and performance.
- Use Azure DevOps and Git for source control, work item tracking, and monitoring CI/CD pipeline builds in a collaborative development environment.

EDUCATION

- Bachelor of Science in Information Technology in Computer Science and Informatics | University of Johannesburg | 2021-2024
- Matric | Hoërskool Birchleigh, Kempton Park | 2020

PROJECTS

UJCvil—Full-Stack Developer (Final-Year Academic Project)
The University of Johannesburg Civil Society Club | Johannesburg, South Africa | January 2024 – November 2024
🔗 Access restricted per academic guidelines – code snippets available on request

- Led the development of a **full-stack club management system** in a team of 4 and collaborating with a faculty mentor to align deliverables with club requirements**:**
  - **Geolocation attendance tracking**: Eliminated manual attendance checks by automating point rewards via geolocation, reducing errors by 50% (estimated).
  - **Points marketplace**: Peer-to-peer transfers, rewards (excursions/merchandise), and secure payment gateways.
  - **Admin dashboard**: Analytics for data-driven decisions, bulk notifications, and event galleries.
  - **Smart recommendations**: Suggested events based on user attendance history.
- Designed **RESTful APIs** and responsive UI/UX, **reducing manual tasks by 40%** via automation.

FarmCare
🔗 ReageNkoana/FarmCare-ComSci-Project

- Engineered a **Java** and **JavaFX** application to track livestock vaccinations using **blockchain**.
- Implemented custom **client-server architecture** using Java I/O streams.
- Enhanced **data integrity** using SHA-256 **cryptographic hashing** to prevent tampering of livestock records.

Machine Learning Snake Agent Simulation
🔗 ReageNkoana/SnakeGameAI: This project implements a Snake game with an AI agent

- Engineered an AI-driven Snake Game using **Python, PyTorch, and Pygame**.
- Trained AI agent to adaptively improve path-finding efficiency, reducing average game-over time by 30% (estimated) through iterative learning.

SKILLS

Technical Expertise

- **Frontend Development**: React, Typescript, HTML/CSS, JavaScript, .NET MAUI, Xamarin, MVC
- **Backend Development**: ASP.NET, Java, Python, Node.js, RESTful APIs
- **Databases**: MySQL, SQL Server, Postgres
- **Cloud & DevOps**: Azure, Git/GitHub

Soft Skills

- Cross-functional Team Collaboration | Adaptability to New Technologies
- Time/Task Prioritization | Quick learner | Attention to detail
- Effective written and verbal communication
- Analytical and problem-solving skills
